Build with AI — Weekend Cohort

2 days · 14 hours

Go from AI consumer to AI builder in one weekend

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹3,999	2 days · 14 hours	Beginner to Intermediate	Live	21 Jun 2026–22 Jun 2026 · 9:00 AM – 4:00 PM IST, 28 Jun 2026–29 Jun 2026 · 9:00 AM – 4:00 PM IST

Prasant Mishra
Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is Build with AI — Weekend Cohort?

A hands-on weekend that teaches you to build real products using AI APIs — not just talk about AI. By Sunday evening you'll have shipped three working projects.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You want to build real AI-powered products and need a structured path from theory to shipping
- ✓ You follow the AI space closely but struggle to connect what you read to what you can actually build
- ✓ You have a programming background and want to go from 'I've used ChatGPT' to 'I built this'
- ✓ You want to work in AI or add AI capabilities to your existing projects

✗ THIS IS NOT FOR YOU IF...

- ✗ You have no programming experience — some Python or JavaScript basics are required to get full value from the hands-on sessions
- ✗ You're looking for academic AI research — this course focuses on practical application and building
- ✗ You already have deep expertise in ML engineering — this is designed for practitioners moving into AI, not ML PhDs

Prerequisites: Basic Python (variables, functions, loops). No AI knowledge needed.

CURRICULUM

4 Sessions — 2 days · 14 hours

DAY 1 — MORNING – DAY 1 — AFTERNOON

AI Foundations & APIs & More

- How LLMs work (intuition)
- OpenAI & Anthropic API setup
- Prompt engineering — zero-shot, few-shot, chain-of-thought
- Structured output & JSON mode
- Project 1: AI Q&A over your own documents (RAG basics)
- Project 2: AI writing assistant with memory
- Token limits, costs & best practices
- Error handling & fallbacks

DAY 2 — MORNING – DAY 2 — AFTERNOON

Advanced Patterns & More

- Function calling & tool use
- Agents — multi-step reasoning
- Embeddings & semantic search
- Evaluating AI outputs
- Project 3: your own AI micro-SaaS concept
- Deploying AI apps (Vercel + API keys)
- Cost optimisation
- What to build next — personal roadmap

LEARNING OUTCOMES

What You'll Walk Away With

01 Build 3 working AI-powered applications

02 Understand prompt engineering deeply

03 Implement RAG and agent patterns

04 Deploy an AI product end-to-end

WHAT'S INCLUDED

Everything You Get

- ✓ Both day recordings (lifetime access)
- ✓ Live 2-hour doubt clearing session
- ✓ All project code
- ✓ Prompt template library
- ✓ 2 weeks doubt support
- ✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect | 15+ Yrs Teaching | 2500+ Students | 60+ Projects Delivered

Prasant has spent years working at the intersection of AI research and real-world deployment — building LLM-powered products, fine-tuning models, and advising companies on AI strategy. Build with AI — Weekend Cohort reflects what he wishes he had when he was navigating this space: a structured, practical path through a landscape full of noise.

He believes the biggest gap in AI education is the leap from "I understand the concepts" to "I can ship something real." This course is designed to close exactly that gap — every session ties theory directly to something you can build and use.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
