ABOUT THIS COURSE

What is C++?

Modern C++ (C++17/20) in one month. Covers OOP, the STL, move semantics, and smart pointers — the features that make C++ both powerful and manageable.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in C++ Programming
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: C basics (or C Sprint)
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: C basics (or C Sprint). Basic understanding of pointers and memory.

4 Sessions — 4 weeks

WEEK 1 – WEEK 2**C++ over C & More**

- References vs pointers
- Classes, constructors, destructors
- Operator overloading
- Const correctness
- Inheritance & virtual functions
- Abstract classes & interfaces
- Templates & generic programming
- STL containers — vector, map, set, deque

WEEK 3 – WEEK 4**Modern C++ & More**

- Move semantics & rvalue references
- Smart pointers — `unique_ptr`, `shared_ptr`
- Lambda expressions
- Range-based for & `auto`
- STL algorithms — `sort`, `find`, `transform`
- Iterators in depth
- File I/O with streams
- Capstone: data processing CLI tool

LEARNING OUTCOMES

What You'll Walk Away With

01 Write modern, idiomatic C++17/20

02 Use STL containers and algorithms effectively

03 Manage memory safely with smart pointers

04 Build performant C++ applications

WHAT'S INCLUDED

Everything You Get

✓ 12 live sessions + all recordings

✓ All project source code

✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant brings over 14 years of hands-on experience across finance, technology, and education to C++. He's held roles spanning equity research, investment banking, and GenAI consulting — and designed this course to give you the frameworks he uses in practice, not a textbook-only view.

His teaching philosophy is to start with the question every practitioner actually asks — not "what is this concept?" but "when do I use this, and why does it work?" Every session in this course is structured around that practitioner's perspective.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
