Prasant brings over 14 years of hands-on experience across finance, technology, and education to MTS III. He's held roles spanning equity research, investment banking, and GenAI consulting — and designed this course to give you the frameworks he uses in practice, not a textbook-only view.

His teaching philosophy is to start with the question every practitioner actually asks — not "what is this concept?" but "when do I use this, and why does it work?" Every session in this course is structured around that practitioner's perspective.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
