ABOUT THIS COURSE

What is Python for Data Science and Machine Learning?

A structured 8-week program covering the complete Python data science stack — from raw data to actionable insights. Project-driven: every week ends with a real dataset.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Python Programming
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Basic Python (variables, loops, functions)
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: Basic Python (variables, loops, functions). No statistics background needed.

4 Sessions — 8 weeks

WEEKS 1-2 -
WEEKS 3-4

Python & NumPy Foundations & More

- Python refresher (fast-paced)
- NumPy arrays & broadcasting
- Vectorised operations
- Random number generation & distributions
- DataFrames & Series
- Indexing, filtering & groupby
- Merging, joining & reshaping
- Handling missing data
- Project: clean a messy real-world dataset

WEEKS 5-6 -
WEEKS 7-8

Visualisation & EDA & More

- Matplotlib & Seaborn
- Exploratory Data Analysis workflow
- Distribution plots, heatmaps, pair plots
- Project: full EDA on Indian census data
- Statistical testing basics
- Correlation vs causation
- Reporting with Jupyter notebooks
- Capstone: end-to-end analysis project

LEARNING OUTCOMES

What You'll Walk Away With

01 Clean, transform and analyse real datasets with Pandas

02 Create clear, publication-quality visualisations

03 Run an end-to-end EDA workflow

04 Present findings clearly in Jupyter notebooks

WHAT'S INCLUDED

Everything You Get

✓ Live sessions + all recordings

✓ All datasets & notebooks

✓ Weekly assignments

✓ Capstone feedback

✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has taught Python to over 2,500 students — from fresh graduates learning their first programming language to senior professionals automating workflows they once thought required a dedicated developer. Python for Data Science and Machine Learning reflects what he's found to be the fastest path from zero to genuine productivity.

His teaching philosophy is rooted in the belief that syntax is the easy part — the hard part is building a programmer's intuition for breaking problems down. Every session is designed to give you both the language and the mental model.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
