Senior AI Engineer

6–8 months

Advanced ML, MLOps, multi-modal AI and AI at production scale

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹64,999	6–8 months	Advanced	Live+Recorded	Ongoing · Sat & Sun · 10:00 AM – 1:00 PM IST, New batches start monthly

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is Senior AI Engineer?

A rigorous 9-month program for engineers who want to move from working with AI to leading AI initiatives. Covers advanced architectures, MLOps, multi-modal systems, and research-to-production workflows.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You want to build real AI-powered products and need a structured path from theory to shipping
- ✓ You follow the AI space closely but struggle to connect what you read to what you can actually build
- ✓ You're curious about AI and want to understand how it works, not just how to use it
- ✓ You want to work in AI or add AI capabilities to your existing projects

✗ THIS IS NOT FOR YOU IF...

- ✗ You have no programming experience — some Python or JavaScript basics are required to get full value from the hands-on sessions
- ✗ You're looking for academic AI research — this course focuses on practical application and building
- ✗ You already have deep expertise in ML engineering — this is designed for practitioners moving into AI, not ML PhDs

Prerequisites: AI Engineer or equivalent — 2+ years building ML systems

5 Sessions — 6–8 months

MODULE 1 —
MONTHS 1–2 —
MODULE 2 —
MONTHS 3–4

Advanced Deep Learning & More

- Transformer architecture in depth
- Attention mechanisms — MHA, cross-attention, flash attention
- Vision transformers (ViT) & CLIP
- Diffusion models fundamentals
- ML experiment tracking (MLflow, W&B)
- Model versioning, registry & governance
- Model serving at scale — Ray Serve, Triton
- A/B testing models in production

MODULE 3 —
MONTHS 5–6 —
MODULE 4 —
MONTHS 7–8

Multi-Modal AI & More

- Vision-language models — LLaVA, GPT-4V
- Audio AI — Whisper & TTS
- Multi-modal RAG systems
- Project: multi-modal AI application
- Reading and implementing ML papers
- Custom CUDA kernels (intro)
- Distributed training — data & model parallelism
- Quantization & model compression

MODULE 5 —
MONTH 9

Leadership & Capstone

- AI system design interviews (senior level)
- Technical leadership in AI teams
- Capstone: production AI system at scale
- Portfolio & career strategy

LEARNING OUTCOMES

What You'll Walk Away With

01 Design and operate ML systems at production scale

02 Build multi-modal AI applications

03 Lead AI engineering teams

04 Implement and ship research papers

05 Pass senior AI Engineer interviews

WHAT'S INCLUDED

Everything You Get

✓ Weekly live sessions + all recordings

✓ Research paper walkthroughs

✓ Code review bi-weekly

✓ Senior AI mock interviews

✓ 1-on-1 mentorship

✓ Alumni network access

✓ Completion Certificate

✓ Interview preparation sessions

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has spent years working at the intersection of AI research and real-world deployment — building LLM-powered products, fine-tuning models, and advising companies on AI strategy. Senior AI Engineer reflects what he wishes he had when he was navigating this space: a structured, practical path through a landscape full of noise.

He believes the biggest gap in AI education is the leap from "I understand the concepts" to "I can ship something real." This course is designed to close exactly that gap — every session ties theory directly to something you can build and use.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.

Senior AI Engineer
