

SPRINT

C

The language that runs the world — memory, pointers, and systems

 4 weeks

 Beginner to Intermediate

 Live

 Prasant Mishra

ABOUT THIS COURSE

A focused month on C — the foundation of systems programming. Learn memory management, pointers, and how computers actually work under the hood.

Prerequisites: Basic programming logic (any language). Curiosity about how computers work.

WHAT YOU'LL LEARN

- 1 Understand pointers and manual memory management
- 2 Write systems-level C programs
- 3 Debug memory errors
- 4 Build a foundation for OS and embedded programming

CURRICULUM · 4 SESSIONS

SESSION WEEK 1

C Foundations

Compilation model & toolchain (gcc, make)

Data types, variables, operators

Control flow

Functions & the call stack

SESSION WEEK 2

Pointers & Memory

Pointers — address of, dereference

Arrays vs pointers

Dynamic memory — malloc, free, realloc

Memory leaks & valgrind

Structs & Files

Structs & typedef

Linked lists in C

File I/O — fopen, fread, fwrite

Command-line arguments

SESSION WEEK 4

Systems C

Preprocessor & macros

Bitwise operations

Writing a simple shell

Capstone: build a mini memory allocator

WHAT'S INCLUDED

✓ 12 live sessions + all recordings

✓ All project source code

✓ Learner's Certificate

UPCOMING BATCHES

Ongoing · Mon, Wed, Fri · 7:00 PM – 8:30 PM IST

New batches start monthly

learner

₹5,999

Live · 4 weeks · Recorded version available at ₹2,999
