

MASTERCLASS

Calculus

Derivatives and integrals — actually understood

 3 hours

 Intermediate

 Live

 Prasant Mishra

ABOUT THIS COURSE

A focused deep-dive into the two big ideas in calculus — derivatives and integrals — built around geometric intuition first and formulas second. You'll leave actually understanding why the rules work.

Prerequisites: Basic algebra and familiarity with functions ($y = f(x)$)

WHAT YOU'LL LEARN

- 1 Differentiate any standard function confidently
- 2 Evaluate definite and indefinite integrals
- 3 Apply calculus to real optimisation problems
- 4 Understand why gradient descent works

CURRICULUM · 3 SESSIONS

SESSION HOUR 1

Derivatives

What a derivative really means — the slope idea

Differentiation rules & shortcuts

Chain rule, product rule — explained visually

Applications: rates of change & tangents

SESSION HOUR 2

Integrals

Integration as area accumulation

Antiderivatives & the reverse process

Definite integrals & the Fundamental Theorem

Substitution method

SESSION HOUR 3

Applications & ML Connections

Optimisation problems — maxima & minima

Related rates

Where calculus appears in ML (gradient descent)

Problem-solving session

WHAT'S INCLUDED

- ✓ Full session recording (lifetime access)
- ✓ Problem set PDF (30 problems)
- ✓ Learner's Certificate
- ✓ Live doubt clearing session (1 hr)
- ✓ Full solutions
