AI Engineer 6–8 months

Train, deploy and maintain AI systems — from fundamentals to production

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹44,999	6–8 months	Intermediate	Live+Recorded	Ongoing · Sat & Sun · 10:00 AM – 1:00 PM IST, New batches start monthly

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is AI Engineer?

A complete program for engineers who want to build real AI systems — not just use AI APIs. Covers machine learning, deep learning, cloud AI services, and MLOps, with three real projects you can deploy.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You want to build real AI-powered products and need a structured path from theory to shipping
- ✓ You follow the AI space closely but struggle to connect what you read to what you can actually build
- ✓ You have a programming background and want to go from 'I've used ChatGPT' to 'I built this'
- ✓ You want to work in AI or add AI capabilities to your existing projects

✗ THIS IS NOT FOR YOU IF...

- ✗ You have no programming experience — some Python or JavaScript basics are required to get full value from the hands-on sessions
- ✗ You're looking for academic AI research — this course focuses on practical application and building
- ✗ You already have deep expertise in ML engineering — this is designed for practitioners moving into AI, not ML PhDs

Prerequisites: Python basics. Some maths background (12th grade level).

6 Sessions — 6–8 months

MODULE 1 —
MONTH 1 —
MODULE 2 —
MONTH 2

Python & Maths for AI & More

- Advanced Python for data science
- NumPy, Pandas, Matplotlib
- Linear algebra & calculus essentials
- Probability & statistics for ML
- Supervised learning — regression, classification
- Model evaluation — cross-validation, metrics
- Feature engineering
- scikit-learn in depth

MODULE 3 —
MONTH 3 —
MODULE 4 —
MONTH 4

Deep Learning & More

- Neural networks from scratch
- PyTorch — training, optimisation
- CNNs for vision, transformers for NLP
- Transfer learning & fine-tuning
- NLP fundamentals — tokenization, embeddings
- Working with LLM APIs
- Fine-tuning with LoRA
- Project: NLP-powered product

MODULE 5 —
MONTH 5 —
MODULE 6 —
MONTH 6

Cloud AI & MLOps & More

- AWS SageMaker & Google Vertex AI
- Model registry & versioning (MLflow)
- Model serving — FastAPI + Docker
- Monitoring model performance in production
- Capstone: end-to-end AI system
- ML system design interviews
- Portfolio & GitHub
- Mock interviews for AI roles

LEARNING OUTCOMES

What You'll Walk Away With

01 Train and evaluate ML models end-to-end

02 Build deep learning systems with PyTorch

03 Deploy AI models to production

04 Set up MLOps pipelines

05 Pass AI Engineer interviews

WHAT'S INCLUDED

Everything You Get

✓ Weekly live sessions + all recordings

✓ 3 real AI projects

✓ Code review bi-weekly

✓ ML system design practice

✓ Mock interviews

✓ Completion Certificate

✓ Interview preparation sessions

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has spent years working at the intersection of AI research and real-world deployment — building LLM-powered products, fine-tuning models, and advising companies on AI strategy. AI Engineer reflects what he wishes he had when he was navigating this space: a structured, practical path through a landscape full of noise.

He believes the biggest gap in AI education is the leap from "I understand the concepts" to "I can ship something real." This course is designed to close exactly that gap — every session ties theory directly to something you can build and use.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.

AI Engineer
