AI Tools 4 weeks

Prompt engineering, APIs and agents — build real AI products

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹8,999	4 weeks	Intermediate	Live	Ongoing · Tue, Thu, Sat · 8:00 PM – 9:30 PM IST, New batches start monthly

ABOUT THIS COURSE

What is AI Tools?

A practical sprint on the tools and patterns driving the AI product explosion. Build five working AI projects across prompt engineering, RAG, agents, and deployment.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You want to build real AI-powered products and need a structured path from theory to shipping
- ✓ You follow the AI space closely but struggle to connect what you read to what you can actually build
- ✓ You have a programming background and want to go from 'I've used ChatGPT' to 'I built this'
- ✓ You want to work in AI or add AI capabilities to your existing projects

✗ THIS IS NOT FOR YOU IF...

- ✗ You have no programming experience — some Python or JavaScript basics are required to get full value from the hands-on sessions
- ✗ You're looking for academic AI research — this course focuses on practical application and building
- ✗ You already have deep expertise in ML engineering — this is designed for practitioners moving into AI, not ML PhDs

Prerequisites: Basic Python. No prior AI experience needed.

4 Sessions — 4 weeks

WEEK 1 – WEEK 2

Prompt Engineering & More

- Zero-shot, few-shot, chain-of-thought
- System prompts & personas
- Structured output with JSON mode
- Prompt evaluation & iteration
- OpenAI & Anthropic API in depth
- Embeddings & vector search
- RAG — chat over your own documents
- Project: document Q&A app

WEEK 3 – WEEK 4

Agents & Tool Use & More

- Function calling & tool use
- Multi-step agent loops
- LangChain / LangGraph basics
- Project: research agent
- Cost optimisation & rate limits
- Streaming responses
- Deploying AI apps to production
- Capstone: your AI product

LEARNING OUTCOMES

What You'll Walk Away With

- 01

Build production-ready AI applications
- 02

Implement RAG and agent patterns
- 03

Deploy AI products to the web
- 04

Optimise for cost and performance

WHAT'S INCLUDED

Everything You Get

- ✓

12 live sessions + all recordings
- ✓

All project code
- ✓

Prompt template library
- ✓

Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has spent years working at the intersection of AI research and real-world deployment — building LLM-powered products, fine-tuning models, and advising companies on AI strategy. AI Tools reflects what he wishes he had when he was navigating this space: a structured, practical path through a landscape full of noise.

He believes the biggest gap in AI education is the leap from "I understand the concepts" to "I can ship something real." This course is designed to close exactly that gap — every session ties theory directly to something you can build and use.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
