Backend Engineering 10 weeks

APIs, databases, caching and production systems — 10 weeks

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹16,999	10 weeks	Intermediate	Live+Recorded	Ongoing · Mon, Wed, Fri · 8:00 PM – 9:30 PM IST, New batches start monthly

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is Backend Engineering?

A thorough 10-week backend engineering program. Build production-grade APIs, master database design, caching, auth, and deployment — with real projects every two weeks.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Backend Engineering
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Python basics
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: Python basics. Basic understanding of APIs (HTTP, JSON).

5 Sessions — 10 weeks

WEEKS 1-2 -
WEEKS 3-4

FastAPI & REST & More

- REST API design principles
- FastAPI in depth — routing, dependencies, middleware
- Request validation with Pydantic
- Project 1: production-ready REST API
- PostgreSQL in depth — schemas, indexes, transactions
- ORM with SQLAlchemy / Prisma
- Database design & normalisation
- Query optimisation

WEEKS 5-6 -
WEEKS 7-8

Auth & Security & More

- JWT authentication & refresh tokens
- OAuth 2.0 flows
- Role-based access control (RBAC)
- OWASP top 10 for APIs
- Redis — caching, sessions, pub-sub
- Background tasks & queues (Celery / BullMQ)
- WebSockets & real-time
- Project 2: real-time chat API

WEEKS 9-10

Deployment & Production

- Docker & docker-compose
- CI/CD with GitHub Actions
- Cloud deployment (AWS / Vercel)
- Capstone: full backend system

LEARNING OUTCOMES

What You'll Walk Away With

01 Build and ship production REST APIs

02 Design and optimise relational databases

03 Implement auth systems securely

04 Deploy backend services to the cloud

WHAT'S INCLUDED

Everything You Get

✓ 30 live sessions + all recordings

✓ All project source code

✓ Architecture reference guide

✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has designed and built backend systems at scale — from high-throughput APIs to distributed data pipelines. Backend Engineering distills the patterns he's applied repeatedly across different stacks and problem domains, presented in the order that builds the clearest mental model.

He's found that most backend struggles come not from lack of knowledge but from not knowing which abstractions to reach for. The goal of this course is to give you a reliable decision framework, not just a list of technologies.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.

Backend Engineering

Live+Recorded · Ongoing · Mon, Wed, Fri · 8:00 PM – 9:30 PM
