Prasant Mishra

Founder & Instructor, Qurious Academy

What is Calculus?

A focused deep-dive into the two big ideas in calculus — derivatives and integrals — built around geometric intuition first and formulas second. You'll leave actually understanding why the rules work.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Mathematics
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Basic algebra and familiarity with functions ($y = f(x)$)
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: Basic algebra and familiarity with functions ($y = f(x)$)

3 Sessions — 3 hours

HOURL 1 – HOURL 2

Derivatives & More

- What a derivative really means — the slope idea
- Differentiation rules & shortcuts
- Chain rule, product rule — explained visually
- Applications: rates of change & tangents
- Integration as area accumulation
- Antiderivatives & the reverse process
- Definite integrals & the Fundamental Theorem
- Substitution method

HOURL 3

Applications & ML Connections

- Optimisation problems — maxima & minima
- Related rates
- Where calculus appears in ML (gradient descent)
- Problem-solving session

LEARNING OUTCOMES

What You'll Walk Away With

01 Differentiate any standard function confidently

02 Evaluate definite and indefinite integrals

03 Apply calculus to real optimisation problems

04 Understand why gradient descent works

WHAT'S INCLUDED

Everything You Get

✓ Full session recording (lifetime access)

✓ Live doubt clearing session (1 hr)

✓ Problem set PDF (30 problems)

✓ Full solutions

✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant approaches mathematics as a language for describing the world precisely — one that unlocks everything from machine learning to financial modelling. Calculus is built on the principle that mathematical intuition comes before symbol manipulation, not after.

He's seen too many students memorise procedures without understanding why they work. Every concept in this course is introduced through motivation first: here's the problem, here's why the standard approach fails, here's why this idea solves it.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
