ABOUT THIS COURSE

What is Chemistry?

A focused 3-hour session covering the core ideas in chemistry — atomic structure, chemical bonding, and reaction types — built around intuition and real-world examples.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Chemistry
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Basic school-level science
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: Basic school-level science. No prior chemistry knowledge needed.

Prasant connects chemistry to its real-world applications in every session — because memorising reactions without understanding the underlying principles is both tedious and fragile. Chemistry is built on the insight that students who understand the "why" behind a reaction remember it without effort.

His teaching approach emphasises the connections between topics that textbooks often treat as separate — bonding theory, thermodynamics, and kinetics aren't isolated chapters, they're lenses on the same fundamental behaviour of matter.
