ABOUT THIS COURSE

What is DSA Deep Dive?

Eight weeks of comprehensive DSA coverage — every data structure, every algorithm pattern, and three full mock interviews. Built for people targeting product companies and top-tier tech firms.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're preparing for technical interviews at product companies (startups, mid-size, or FAANG-adjacent) and want a structured, pattern-based approach
- ✓ You've tried grinding LeetCode on your own and find yourself stuck on medium problems without a clear methodology
- ✓ You're a developer who codes daily but hasn't formally studied algorithms
- ✓ You have an interview coming up in 2–3 months and want focused, accountable preparation

✗ THIS IS NOT FOR YOU IF...

- ✗ You can't write basic code yet — you need to be comfortable with loops, functions, and basic data types in at least one language first
- ✗ You're looking for system design or behavioural interview prep — this course focuses entirely on data structures and algorithm problems
- ✗ You want a comprehensive CS degree curriculum — this is scoped specifically to interview preparation

Prerequisites: Python basics. One or more of: DSA Sprint, or 50+ LeetCode problems solved.

6 Sessions — 8 weeks

WEEKS 1-2 -
WEEK 3

Arrays, Strings & Hashing & More

- Two pointers & sliding window
- Hash maps & hash sets
- Prefix sums & difference arrays
- Binary search variants
- Singly & doubly linked lists
- Fast & slow pointers
- Stack patterns
- Monotonic stack

WEEK 4 - WEEK 5

Trees & More

- Binary tree traversals
- Binary search trees
- Tree construction problems
- Segment trees & Fenwick trees
- DFS & BFS patterns
- Union-Find
- Topological sort
- Shortest paths — Dijkstra, Bellman-Ford

WEEK 6 - WEEKS
7-8

Dynamic Programming & More

- DP patterns — 1D, 2D, interval
- Classic DP: knapsack, LCS, edit distance
- DP on trees & graphs
- Bitmask DP
- Heaps, tries & advanced data structures
- Greedy algorithms
- Backtracking
- 3 full mock interviews with written feedback

LEARNING OUTCOMES

What You'll Walk Away With

01 Solve hard LeetCode problems consistently

02 Recognise and apply 25+ algorithm patterns

03 Perform at a high level under interview pressure

04 Ready for FAANG and top product company screens

WHAT'S INCLUDED

Everything You Get

✓ 24 live sessions + all recordings

✓ 100 curated problem list

✓ Pattern cheat sheet

✓ 3 mock interviews with feedback

✓ Learner's Certificate

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has both conducted technical interviews and prepared candidates for them over his career. He's seen which preparation strategies lead to consistent performance and which lead to candidates who freeze when they see a problem that looks slightly different from what they practiced. The pattern-first approach in DSA Deep Dive is a direct response to that observation.

His focus in mock interviews is on the thinking process as much as the solution — because interviewers are evaluating how you think, communicate, and handle uncertainty. The frameworks you'll build in this course are the same ones he uses when evaluating candidates.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
