GenAI Deep Dive

12 weeks

LLMs, RAG, agents, fine-tuning and production AI — end to end

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹24,999	12 weeks	Intermediate to Advanced	Live+Recorded	Ongoing · Sat & Sun · 10:00 AM – 12:30 PM IST, New batches start monthly

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is GenAI Deep Dive?

A comprehensive 12-week deep dive into generative AI — from how LLMs work to building and shipping production AI systems. The most complete GenAI program at this price point.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You want to build real AI-powered products and need a structured path from theory to shipping
- ✓ You follow the AI space closely but struggle to connect what you read to what you can actually build
- ✓ You have a programming background and want to go from 'I've used ChatGPT' to 'I built this'
- ✓ You want to work in AI or add AI capabilities to your existing projects

✗ THIS IS NOT FOR YOU IF...

- ✗ You have no programming experience — some Python or JavaScript basics are required to get full value from the hands-on sessions
- ✗ You're looking for academic AI research — this course focuses on practical application and building
- ✗ You already have deep expertise in ML engineering — this is designed for practitioners moving into AI, not ML PhDs

Prerequisites: Python. Basic familiarity with AI APIs (or AI Tools Sprint).

6 Sessions — 12 weeks

WEEKS 1-2 -
WEEKS 3-4

LLMs — How They Work & More

- Transformer architecture in depth
- Tokenization, embeddings, attention
- Pre-training vs fine-tuning
- Evaluating LLM outputs
- Advanced prompting techniques
- OpenAI & Anthropic APIs in depth
- Structured output & function calling
- Cost & latency optimisation

WEEKS 5-6 -
WEEKS 7-8

RAG Systems & More

- Embeddings & vector databases (Pinecone, Weaviate, pgvector)
- Chunking strategies & retrieval patterns
- Hybrid search — dense + sparse
- Project: production-grade RAG app
- Tool use & function calling
- Multi-step agent loops
- LangGraph — stateful agents
- Project: autonomous research agent

WEEKS 9-10 -
WEEKS 11-12

Fine-Tuning & More

- When to fine-tune vs prompt
- LoRA & QLoRA in practice
- Dataset curation & formatting
- Fine-tuning Llama & Mistral
- Observability — tracing & evals
- Safety & guardrails
- Deploying GenAI to production
- Capstone: your own AI product

LEARNING OUTCOMES

What You'll Walk Away With

01

Build production-grade RAG and agent systems

02

Fine-tune open-source LLMs

03

Deploy GenAI products at scale

04

Evaluate and monitor AI systems

WHAT'S INCLUDED

Everything You Get

✓

24 live sessions + all recordings

✓

All project code

✓

Prompt & RAG template library

✓

Capstone project mentorship

✓

Learner's Certificate

✓

Alumni network access

LOGISTICS

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has spent years working at the intersection of AI research and real-world deployment — building LLM-powered products, fine-tuning models, and advising companies on AI strategy. GenAI Deep Dive reflects what he wishes he had when he was navigating this space: a structured, practical path through a landscape full of noise.

He believes the biggest gap in AI education is the leap from "I understand the concepts" to "I can ship something real." This course is designed to close exactly that gap — every session ties theory directly to something you can build and use.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.

GenAI Deep Dive

Live+Recorded · Ongoing · Sat & Sun · 10:00 AM – 12:30 PM IST,
