Maths for ML — Power Weekend 2 days · 14 hours

Calculus + Linear Algebra + Probability in one focused weekend

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹2,999	2 days · 14 hours	Intermediate	Live	21 Jun 2026– 22 Jun 2026 · 9:00 AM – 4:00 PM IST, 28 Jun 2026–29 Jun 2026 · 9:00 AM – 4:00 PM IST

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is Maths for ML — Power Weekend?

The complete maths toolkit for machine learning — taught in two intense, focused days. Designed for people who want to understand AI deeply, not just use it.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Mathematics
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: 12th grade maths (algebra, basic trigonometry)
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: 12th grade maths (algebra, basic trigonometry). No calculus experience needed.

4 Sessions — 2 days · 14 hours

DAY 1 —
MORNING – DAY 1
— AFTERNOON

Calculus for Optimisation & More

- Derivatives & partial derivatives
- Gradient descent from scratch
- Chain rule & backpropagation intuition
- Multivariable optimisation
- Vectors, matrices & transformations
- Matrix multiplication
- Eigenvalues & PCA
- NumPy hands-on

DAY 2 —
MORNING – DAY 2
— AFTERNOON

Probability & Statistics & More

- Probability basics — distributions, Bayes' theorem
- Expected value & variance
- MLE & MAP estimation
- Information theory basics (entropy, KL divergence)
- How all three areas combine in a neural network
- Reading an ML paper's maths section
- Problem-solving marathon
- Personal study plan

LEARNING OUTCOMES

What You'll Walk Away With

01 Understand gradient descent mathematically

02 Read ML papers without fear

03 Use NumPy for matrix operations

04 Solve probability problems for ML interviews

WHAT'S INCLUDED

Everything You Get

✓ Both day recordings (lifetime access)

✓ Live 2-hour doubt clearing session

✓ Problem sets with full solutions

✓ Formula reference PDF

✓ Learner's Certificate

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant approaches mathematics as a language for describing the world precisely — one that unlocks everything from machine learning to financial modelling. Maths for ML — Power Weekend is built on the principle that mathematical intuition comes before symbol manipulation, not after.

He's seen too many students memorise procedures without understanding why they work. Every concept in this course is introduced through motivation first: here's the problem, here's why the standard approach fails, here's why this idea solves it.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
