ABOUT THIS COURSE

What is Senior Systems Engineer?

The most advanced systems program at Qurious Academy. Covers distributed systems architecture, SRE fundamentals, reliability engineering, chaos engineering, and production operations at scale. Designed for engineers targeting Staff/Principal-level systems roles.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're an experienced professional wanting to deepen expertise in Systems Engineering
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Systems Engineer or equivalent 3+ years in infrastructure/platform engineering
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prasant has designed and built backend systems at scale — from high-throughput APIs to distributed data pipelines. Senior Systems Engineer distills the patterns he's applied repeatedly across different stacks and problem domains, presented in the order that builds the clearest mental model.

He's found that most backend struggles come not from lack of knowledge but from not knowing which abstractions to reach for. The goal of this course is to give you a reliable decision framework, not just a list of technologies.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
