ABOUT THIS COURSE

What is SQL & Data?

A focused sprint covering SQL from scratch to advanced queries, plus Python data analysis with pandas. Every session uses real datasets.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Data & SQL
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: Basic Python helpful but not required
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: Basic Python helpful but not required. No SQL experience needed.

4 Sessions — 4 weeks

60+ Projects Delivered

Prasant brings over 14 years of hands-on experience across finance, technology, and education to SQL & Data. He's held roles spanning equity research, investment banking, and GenAI consulting — and designed this course to give you the frameworks he uses in practice, not a textbook-only view.

His teaching philosophy is to start with the question every practitioner actually asks — not "what is this concept?" but "when do I use this, and why does it work?" Every session in this course is structured around that practitioner's perspective.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
