ABOUT THIS COURSE

What is Staff Software Engineer?

A 12-month program for senior engineers aiming at Staff / L7 roles — where the job is no longer just about writing code, but about shaping engineering direction across teams. Covers technical roadmapping, architectural deep-dives, Staff-level interview prep, and real leadership case studies.

Prasant brings over 14 years of hands-on experience across finance, technology, and education to Staff Software Engineer. He's held roles spanning equity research, investment banking, and GenAI consulting — and designed this course to give you the frameworks he uses in practice, not a textbook-only view.

His teaching philosophy is to start with the question every practitioner actually asks — not "what is this concept?" but "when do I use this, and why does it work?" Every session in this course is structured around that practitioner's perspective.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
