Systems Engineer

6–8 months

Infrastructure, cloud, automation and reliability — your foundation in systems

PRICE	DURATION	LEVEL	FORMAT	SCHEDULE
₹39,999	6–8 months	Beginner to Intermediate	Live+Recorded	Ongoing · Sat & Sun · 10:00 AM – 12:30 PM IST, New batches start monthly

Prasant Mishra

Founder & Instructor, Qurious Academy

ABOUT THIS COURSE

What is Systems Engineer?

A comprehensive program for people who want to work with infrastructure, cloud, and systems — rather than writing application code. Covers Linux, scripting, Docker, cloud infrastructure, databases, and monitoring.

IS THIS RIGHT FOR YOU?

Who Should Enroll

✓ THIS IS FOR YOU IF...

- ✓ You're someone with foundational knowledge ready to go further in Systems Engineering
- ✓ You want to learn by doing — with projects, exercises, and live instruction rather than passive video-watching
- ✓ You value efficiency: you'd rather spend focused hours on the right material than months on self-directed study
- ✓ You want expert feedback and a structured environment to stay accountable

✗ THIS IS NOT FOR YOU IF...

- ✗ You don't yet meet the prerequisites: None — curiosity about how systems work is enough
- ✗ You prefer entirely self-paced learning with no live component — this course includes scheduled live sessions
- ✗ You already have advanced expertise in this area and are looking for highly specialised material

Prerequisites: None — curiosity about how systems work is enough

6 Sessions — 6–8 months

MODULE 1 —
MONTH 1 —
MODULE 2 —
MONTH 2

Linux & Networking & More

- Linux file system, permissions, processes
- Bash scripting for automation
- Networking fundamentals — TCP/IP, DNS, HTTP
- SSH, firewalls & security basics
- Python scripting — files, APIs, OS interaction
- Automating infrastructure tasks
- Configuration management concepts
- Project 1: automated deployment script

MODULE 3 —
MONTH 3 —
MODULE 4 —
MONTH 4

Containers & Orchestration & More

- Docker — images, containers, volumes, networking
- Docker Compose — multi-service apps
- Kubernetes fundamentals
- Project 2: containerised 3-tier app
- AWS core services — EC2, VPC, S3, IAM
- Load balancers, auto-scaling groups
- RDS & ElastiCache
- Infrastructure as Code with Terraform

MODULE 5 —
MONTH 5 —
MODULE 6 —
MONTH 6

CI/CD & Monitoring & More

- GitHub Actions — build, test, deploy pipelines
- Observability — logs, metrics, traces
- Prometheus & Grafana
- Alerting & on-call basics
- Capstone: production infrastructure project
- Systems interview prep
- Portfolio & GitHub optimisation
- Mock technical interviews

LEARNING OUTCOMES

What You'll Walk Away With

01 Administer Linux systems confidently

02 Build and manage containerised infrastructure

03 Deploy applications to AWS

04 Set up CI/CD pipelines and monitoring

WHAT'S INCLUDED

Everything You Get

✓ Weekly live sessions + all recordings

✓ 3 real infrastructure projects

✓ Code review bi-weekly

✓ Weekly doubt sessions

✓ Mock interview sessions

✓ Completion Certificate

✓ Interview preparation sessions

About Prasant Mishra

Prasant Mishra

Founder & Instructor — Qurious Academy

GenAI Solutions Architect

15+ Yrs Teaching

2500+ Students

60+ Projects Delivered

Prasant has designed and built backend systems at scale — from high-throughput APIs to distributed data pipelines. Systems Engineer distills the patterns he's applied repeatedly across different stacks and problem domains, presented in the order that builds the clearest mental model.

He's found that most backend struggles come not from lack of knowledge but from not knowing which abstractions to reach for. The goal of this course is to give you a reliable decision framework, not just a list of technologies.

QuriousAcademy

Focused, live learning for curious minds. No fluff — just the concepts that matter.
